

Fireproofing and sealing of cable trays in renovation project

Overview

When cable trays pass through walls or floors, seal openings using fire-rated penetration sealing materials. FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. The proper coating and acceptance of fireproof cable trays are essential for long-term performance and safety.

Fireproofing and sealing of cable trays in renovation project

Cable Tray Covering & Fire Protection

Whether you need certified fireproofing, firestopping, insulation, or photoluminescent safety systems, our team is ready to support your project with rapid response and code-compliant solutions.
