FIBER OPTIC COMPONENTS

Overview

FRP rods play a dual role—providing cable reinforcement during installation while reducing tension on signal-carrying optic fibers or conductors. AKSH is globally recognized for high quality FRP (Fibre reinforced plastic) rods, ARP (Aramid reinforced plastic) rods and WB & NWB Glass yarn (water blocking Yarn) giving the best reinforcement and strength to optical. Traditional GRP is composed of high strength E-glass fibers impregnated with a variety of specialized proprietary resins. Our resin chemistry is optimized for process conditions, fiber adhesion, and end-use application. Our extensive product range includes utility poles, light poles, transportation signage poles, telecommunication poles, and foundational components. Each bracket offers several standoff distances and end-fitting types to meet the specific needs of each application.

Frp pole optical cable support

FRP - Cable Reinforcement Solutions , Recartelecom

Di-electric cable composite strength member widely known as FRP/GRP rod is designed to provide excellent strength performance while maintaining high degree of stiffness, preventing cable buckling

Why Choose Us

- 20 Years of OEM/ODM 20 Years factory manufacturing experience.
- Professional R & D team 30 years experience in optical electronic engineer.
- Fully Certified Quality certified CE,UL,ROHS,ISO9001,ISO14000 etc.
- Timely Delivery 21 production lines, 500 employees, Timely delivery guaranteed.
- Quality Assurance Professional QC team with full process inspection.
- After-sales service After-Sales Service for Customer Satisfaction.

FRP - Cable Reinforcement Solutions , Recartelecom

FRP - Cable Reinforcement Solutions Aksh is a pioneer in manufacturing of raw materials for optical fibre cables. AKSH is globally recognized for high quality FRP (Fibre reinforced plastic) rods, ARP
