

Ftu distribution box

Overview

In distribution power grid, Feeder Terminal Unit (FTU) is the key point to realize feeder automation. The most flexible FTUs in the industry The DKT FTUs consist of a fiber tray/splice module, a click-on adapter module (with SC/APC, SC/PC or SC/UPC adapters included) and a protective cover mounted on top. The FTU-820 is our standard FTU with 2 pre-installed pigtails, Dual-fiber (Data/CATV) and Dual LC/APC patch in (green). It comes with various models, suitable for ring main units, switch stations, and other applications with 8 and 16 bays, respectively. The fiber splitter distribution box supports fiber splicing, splitting, distribution, "three in one" and fiber optic distribution box also offers solid protection.
