

Gpon user device LOS indicator is red

Overview

A Red Loss of Service Light indicates you have a total loss of Light from the Head End Port and or High Light Loss of -40dBm or more. The Loss Range for the ONT needs to be no greater than -26dBm but will work at around -30dBm. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. What kind of router are you using at the moment please?

Chris S It's the ONT if it's the LOS (loss of signal) light that is lit Hub is orange light TBH, the LOS light being lit means the router lights are irrelevant, they must be in a. fiber router los red light / pon green light problem solution 2024 #gpon #redlight loss and pon light bilking issues fixed red light loss issues fixed huawei fiber router Los light on,fix router red light los / pon green light problem solution 2020 (easy solution). A LOS red light in your router or modem means that there is a disruption in the fiber optic connection from your Internet service provider (ISP), hence a "loss of signal" (LOS).
