

H3C View Optical Module Wavelength

Overview

If an optical module is installed in a running device, you can run the display transceiver command to view parameters of the optical module, including the center wavelength, transmission distance, fiber types supported, receive optical power, and transmit optical power. The following uses the Moduletek QSFP-40G-LR4 module connected to an H3C S6820 switch as an example to introduce how to read information of the connected optical module on an H3C switch. Serial Number : 210231A562X098003199 Manufacturing Date : 2009 - 08 - 15 Vendor Name : H3C The price of 400g optical module is amazing. <https://> A lot of questions to download the line segment tree to write, however it is not even simpler?

A array of USE. For inquiries about our products or pricelist, please leave your information with us and we will be in touch with in 24 hours.

H3C View Optical Module Wavelength

HPE H3C JG661A Compatible 40GBASE-LR4 QSFP+ Optical Transceiver Module

QSFPTEK for HPE H3C JG661A compatible 40G QSFP+ optical transceiver comes with an LC duplex connector, supporting DOM/DDM and up to 10km link over OS2 single-mode fiber (SMF) at 1310nm
