

Heating cable of fan distribution box

Heating cable of fan distribution box

Junction Boxes for Self-Regulating Heating Cables

Cable gland of the box is intended for connecting unarmoured power cables with a diameter of 7 to 18 mm or armored power cables with a diameter of 12 to 20 mm.

Section 5.0 -- Ventilation and Air Distribution

Scope Technical Committee 5.3 is concerned with the distribution, diffusion and conditioning of air within rooms and similarly treated spaces. It includes consideration of the principles of air distribution, air

ELECTRIC HEAT TRACING

Formation of ice may be prevented by laying a heating cable in the tray, alternatively, attached under the tray. The spiral pitch should be 150-200mm, and the underside of the tray should have a minimum of
