

High-density micro-module data center 1200mm deep in stock

Overview

Huawei FusionModule800 offers an intelligent small data center solution, perfect for financial, government, healthcare, and energy sectors, combining compact design with advanced management features for enhanced performance. With integral cooling, power supply and security functions, it boasts rapid installation, exceptional energy efficiency and reliable operation, even in the most challenging environments. The development trajectory of the computer is actually the development trajectory of the data center, which tends to be miniaturized, mobile, consumerized, service-oriented, and modularized. This next generation High Power Density data center utilizes the Vertiv™ Liebert®.

High-density micro-module data center 1200mm deep in stock

The Intelligent Micro Module, the Element of Intelligent

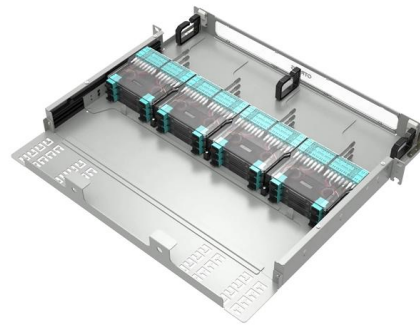

The Intelligent Micro Module can provide simultaneous, efficient operations in order to provide the best green data center, the best asset management, and optimum
