

How are Russian U-shaped cable trays

Overview

U-type Cable Tray – Specifications and Applications U-type cable trays are used for open laying and organizing low-current cable lines with low load. Thanks to their open design, they provide easy access to cables, simplify installation, and allow for quick system. This detailed video showcases the

efficiency manufacturing solution capable of producing both cable trays and their covers on a single line. There are several types of cable trays, including ladder, perforated, solid bottom, basket, and channel trays.] The perforated U steel cable tray is a specialized product developed for the computer rooms and stations of telecommunications operators such as China Telecom, China Mobile, China Unicom, China Netcom and China Railcom. At the present time it's one of the leading manufacturers of cable support systems for electrical installations in Russia.
