

How are network cables numbered in a network cabinet

Overview

If the cable is connected to a device in a cabinet, specify the serial numbers of the cabinet, the chassis, and the Ethernet interface of the device. The site is structured as follows: 90% of the structured cabling comprises of: Cable terminated at patch panel in comms cab at one end and RJ45 plugged into a desk mount switch in an office. Because labeling can not only save you lots of time on troubleshooting but also can save the cost of moves, adds, and changes to the system. The aim is a secure, maintainable and scalable operation of the network environment.
