

# How do I locate the fiber optic splice box

## Overview

---

Special splice trays are in the back of the rack or on sliding trays for access. When there's only one fiber going in and one coming out of a splice case, you can connect right at the case and trace it clean. 5 loops of fiber behind the tray, then wrap all remaining fibers within the closure. Buffer Tubes: Use single-core buffer tubes for individual fibers and ribbon buffer tubes for ribbon fibers. A splice box (also known as splice distributor) is a housing in which fiber optic cables begin or end.

## How do I locate the fiber optic splice box
