

# **How high should the fiber optic cable in Paraguay be**

## Overview

---

The International Telecommunication Union (ITU) and Institute of Electrical and Electronics Engineers (IEEE) recommend a minimum depth of 0. 0 meters for rural or agricultural zones to protect against frost, plows, and erosion. That's why, fiber optic cables need to be buried deeper in rural areas, like about 60-120 cm. He shared a post on Reddit and was in a dilemma that he had certainly cut his own fiber cable during grass. From hyperscale data centers to enterprise campus networks, fiber optic cables are the foundation of high-speed connectivity.
