

How long does it typically take for a telecommunications fiber optic cable installation project to complete

Overview

The installation process usually takes 2 to 6 hours for straightforward installations, depending on your building's setup and existing infrastructure. Commercial installations or situations requiring new fiber optic cables to be laid may take longer. This comprehensive guide breaks down the typical timeline, from initial sign-up to your first lightning-fast connection, covering factors that influence speed and what to expect in 2025. The fiber optic provisioning time—that is, the period from when you sign up for the service until it's fully operational at your home—is not a fixed, unchangeable timeframe.
