

How much does a building electrical distribution box cost

Overview

The price for a new electrical box typically combines panel cost, labor, and permitting. In practice, the total project range often falls between about \$1,500 and \$6,500 for a standard residential panel upgrade, with higher costs for larger or multi-branch systems. When you start looking for a distribution box, you'll quickly realize the price range is wider than a highway. You might find a small plastic unit for the price of a fancy dinner, or an industrial-grade stainless steel beast that costs as much as a compact car. Understanding these variables will help in budgeting accurately for your electrical project.
