

How much does one meter of mesh-type stainless steel cable tray cost

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. Cable trays will tend to be significantly less expensive to use in 2026 than metal pipes due to their faster installation. JLH Electric offers custom sizes and lengths of stainless steel wire mesh cable trays at competitive factory prices. 5/m² for standard construction specifications, while fine woven filtration mesh in SS316 can reach \$90+/m². That number matters, but it's rarely the one that decides whether a project stays within budget. The real cost shows up later, during installation, during upgrades, and during the first few years of operation.
