

How to Choose a Mesh Cable Tray

Overview

Selecting the correct cable tray type is not arbitrary—it depends on a combination of cable characteristics, environmental conditions, and installation requirements. Unlike conduit systems, cable trays allow cables to be laid in bundles, improving accessibility, heat. Cable Type: Power prefers ladder; data/fibre favours wire mesh; mixed circuits suit perforated. These trays typically consist of a network of horizontal and vertical supports that create a pathway for cables to run through Cable trays come in. Wire mesh trays are designed for versatility; therefore, they can be installed on-site by cutting, shaping, and/or modifying the trays directly to meet your required layout.
