

How to configure a router with a fixed IP address for fiber optic connection

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. The internet connection type is usually one of the following three: Dynamic IP, Static IP, or PPPoE.
