

How to peel off the protective layer of optical fiber cable

Overview

- Use a fibre optic cable stripper to remove the protective coating from the end of the cable. In this instructional video, Bob Licari, Test Equipment Product Manager, demonstrates a simple way to strip optical fiber. Other types of cables may have different construction or additional layers, but regardless of the number and types of layers involved, the following generally holds true.

How to peel off the protective layer of optical fiber cable

1

An Overview Of Optical Fiber Cable Structure And

An optical fiber cable is a complex structure designed to protect fragile glass fibers that transmit digital data using light signals. This advanced cabling solution allows
