

Huawei optical splitter 1 to 4 F30

Overview

The Huawei OSPL43201 is a highly efficient optical splitter designed for even splitting of optical signals at a 1:4 ratio. Featuring an SC/APC termination with a compact size of 60x7x4mm, this product is an excellent choice for high-performance fiber optic network deployment. Huawei FTTR uses intelligent conflict optimization and bandwidth adjustment to support up to 128 concurrent users⁴. Huawei's fiber to the room (FTTR) solution extends fibers to rooms and provides various gigabit Wi-Fi 6 master/slave FTTR units, all-optical components, and optical cable routing tools. As 200 Mbps or higher bandwidth becomes the mainstream and requirements for services such as online education, video, VR, e-Sports, and smart office increase sharply, users need Wi-Fi that supports high bandwidth, low latency, wide coverage, and multi-user concurrent access, driving operators to.

Huawei optical splitter 1 to 4 F30

Fiber to The Room (FTTR) Solution

The Huawei FTTR solution uses dedicated pipe routing tools, innovative micro optical cables, and transparent optical cables, which are easy to be routed through pipes without fiber splicing.
