

# **Incoming main line switch of distribution box**

## Overview

---

Generally, 63A MCB is used as the main switch in most of the domestic installations. That cable running from your main service entrance to your distribution box isn't just another wire - it's the critical link that determines how safely and efficiently power flows through your entire building. Make poor choices here, and you're potentially looking at: Electrical systems are like a. Single Phase Distribution Box generally consists of Double Pole MCBs, Single Pole MCBs, and RCCBs. Our mission is to meet customer's expectations by providing satisfaction through cost, quality, service, delivery and continuous improvement.
