Industrial security-grade Ethernet switches

Overview

Industrial-grade Ethernet Switches are specifically designed to connect devices in network environments that are subject to extreme operating temperatures of -40°C to 75°C, vibrations, and shocks. Increase productivity, boost security, and empower industrial AI with Cisco's wide range of market-leading industrial switches. 3at), protocol switches, EN50155 and IEC61850-3-certified switches, and SFP modules with rackmount and. Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to-performance ratios. These rugged devices are designed for industrial use and are fully compatible with IEEE 802.
