

Installation height of stainless steel distribution box

Overview

The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. The fixing method should be firm and reliable to avoid movement or tilting of the box due to vibration or collision.
