

Installation of Timed Dual Power Distribution Box

Overview

Use UL/CE-certified parts and record installation details for future inspections. The possible power installation configurations are: Dual-power installation: Redundant distribution panel and switch This configuration requires that the system receives power from two separate power distribution panels. A dual power switching box is precisely the kind of gadget that guarantees a constant flow of electricity as it enables the user to shift the operational state between two different energy supplies. It can be found in homes, workplaces, factories, and anywhere else where sudden cuts of energy can. The ATS Dual Power Distribution Box plays a pivotal role in providing efficient low-voltage power solutions, ensuring that power flows seamlessly, even in the event of an outage. What Is a Dual Power Automatic Transfer Switch?

Why Choose ONCCY?

Product Parameter	
Product Type:	Cable tray, ladder, perforated and wire mesh cable tray
Material:	45 steel, SPCC, 2014L, Aluminum, SS304/316, FRP
Finish:	45 Electro-gal, HSG, Powder coated, Electrolytic passivating
Width:	10-1000mm
Height:	25mm, 50mm, 75mm, 100mm, 150mm or as you required
Thickness:	1.5-3.0mm (Diameter/size down for extra mesh cable tray)
Length:	2m, 2.5m, 3.0m, 3.5m, 4m, 5m
Capacity:	1000-10000kg or Customized
Lead Time:	10 days for a 20' standard; 14 days for a 40' standard
Port of Loading:	Shanghai Port, Ningbo Port ect.
