

# **Installation price of stepped distribution box**

## Overview

---

A typical home replacement for a 100–125A indoor panel runs about \$1,200–\$2,500 in parts and labor; a 200A outdoor upgrade with new meter socket can reach \$3,000–\$6,000. Assumptions: standard conduit routing, existing wiring reachable within 10–30 feet, and a single dwelling. Key cost drivers include panel amperage, indoor vs outdoor location, wiring length, and whether a full panel upgrade or rerouting is needed. Understanding distribution box cost involves examining the comprehensive investment required for electrical distribution systems that serve as crucial infrastructure components in residential, commercial, and industrial settings. The market price is usually between \$10 and \$25, making it a relatively affordable choice. An electrical distribution box, also known as a power distribution box, panelboard, or consumer unit, is the core of an electrical system.
