

Instructions for Use of the Four- in-One Optical Distribution Box

Overview

This guide provides the full installation workflow for both the Client Module (Riser Cable Installation) and the Operator Module (Feeder Cable Installation), along with detailed instructions for PLC Splitter installation and patch cord routing between modules. This user manual provides instructions on how to use the Optical Box Distribution SC 4B for building FTTH networks in indoor and outdoor environments. With a water-proof design and protection grade of IP65, it's perfect for wet conditions. Wherever glass fiber connections have to be installed in a harsh environment - in offices, industry or Fiber-to-the-Building/-Home customer access networks - high demands are made on the value and flexibility of the distributor housing and easy access whilst installation and maintenance. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. The 4 ports are sized for main cable from 9 to 16mm in diameter, along with 16 3mm cables.

Instructions for Use of the Four-in-One Optical Distribution Box

How To Choose Fiber Optic Distribution BOX - Topfiberbox

The fiber distribution box is a frequently used product in FTTH and FTTB networks. It shields the optical cable's connection point to access the customer end, making the optical cable
