

# **Integrated Molding Equipment for Cable Trays**

## Overview

---

The cable tray production line is an intelligent mechanical integrated system designed for the production of cable tray systems, which realizes the precise forming of the bridge structure through automated processes. A cable tray system used to support insulated electrical cables used for power distribution control and communication as an alternative to open wiring or electrical conduit systems. In addition, Cable tray systems are the right solution for running large quantities of data cables overhead or. We are a high-tech enterprise specializing in the research and development, manufacturing, and sales of cable tray production equipment.

## Integrated Molding Equipment for Cable Trays

---

### Cable Tray Machine factory

We offer modular design cable tray production equipment, including integrated molding machines, cover plate machines, and punching machines. These
