

# **Intelligent Cable Tray Maintenance**

## Overview

---

Predictive maintenance for key systems watches cable health, looking at temperature or strain. Wireless protocols like Wi-Fi, Bluetooth, Zigbee, or LoRaWAN let sensors send data without extra wires, which makes installation easier. Our range of components lets you configure a cable tray to route cables through unused space, while keeping them accessible for easy maintenance. Whatever your configuration, your cables are under control with nVent HOFFMAN! Choose from our wide range of cable carrier sizes and finishes. A cable tray system is a structural support pathway designed to hold, route, and organise electrical and data cables.

## Intelligent Cable Tray Maintenance
