

Intelligent LC Adapter for Oil and Petrochemical Industry

Overview

This IP68-rated adapter boasts a sturdy LC configuration with socket contacts (female) for optimal transmission. It supports both single-mode (SM) and multi-mode (MM) fiber modes and can handle up to 100VDC of power. The 2D-LC instrument used for this study was an Agilent 1290 Infinity 2D-LC Solution system. The system comprised the following modules: two binary pumps, a high-performance. SANWA's LC Series delivers the highest optical performance with compact innovative engineering and new designs. The analysis of petroleum feedstock and finished products is traditionally achieved using gas chromatography (GC) coupled to a number of detectors, the most sensitive and selective being the mass spectrometer. Additionally, the L-com FOA-LCHBS-D is built to ODVA standard and features 2x LC. WCFO designs and manufactures a full family of LC products including a full line of LC adapters.

Intelligent LC Adapter for Oil and Petrochemical Industry

Intelligent ship oil detection sensor based on LC resonance

With the vigorous development of the shipping industry, ship intelligence has become an important direction for the development of the shipbuilding industry, and the predictive maintenance
