

Invisible Optical Cable Fiber Interface

Overview

Provides a nearly invisible fiber path to directly connect your modem to a computer, TV, or gaming console — no drywall repairs, no tripping hazards, no complaints from your spouse. Two Ethernet to fiber converters are included which allows connection to any devices with. Invisible cable technology represents a groundbreaking advancement in the realm of fiber optics. FTTR, or Fiber to the Room, is a networking technology that extends fiber optic connectivity directly into every room of a home or office. Channel that provides easy installation and removal Guaranteed quality with FiberHome technology and excellent service Intelbras.
