

# Is the CE12808 a core switch

## Overview

---

The CE12808 is an 8-slot chassis-type core switch in the CloudEngine 12800 series, positioned for large/super-large data center cores, high-end campus network cores, and cloud backbones. Currently, CE12800 series switches include the CE12804, CE12808, CE12812, CE12816, CE12804S, CE12808S, CE12804E, CE12808E, and CE12816E. Using next-generation VRP8 software platform, Huawei CloudEngine 12808 Switch provides a stable, reliable, and secure high-performance L2/ L3 switching. Its main features include ultra-large switching capacity, ultra-high density 100G/40G, orthogonal CLOS. It helps build elastic, virtualized, and high-quality networks by providing high-performance Layer 2/Layer 3 switching capabilities that are stable, reliable, and. Up to 288\*100GE QSFP28 ports, or 1152\*25GE ports (100GE breakout), 288\*40GE QSFP+ ports, or 1152\*10GE ports (40GE breakout) 3.
