

Is the network a fiber optic channel

Overview

Fibre Channel (FC) is a high-speed network protocol based on fiber optic transmission technology that connects computers and storage devices. It's all about performance, reliability, and low-latency communication in enterprise environments. Fiber Channel It is a data storage network interconnection protocol that enables the transfer of large amounts of information at high speed.

Is the network a fiber optic channel

Cassette Type Fiber Optic PLC Splitters

Discover our high-performance Cassette Type Fiber Optic PLC Splitters. Plug-and-play design, low loss, and compact size for FTTH, PON, and GPON networks.
