

Israeli EDX1800 Spectrum Analyzer

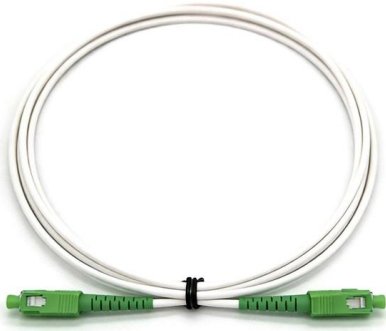

Overview

XRF spectrometer EDX1800B is X-ray fluorescence analyzer designed for analysis of compliance with the RoHS / WEEE directive. Measurements are fast and fully non-destructive, so the device is suitable for the measurement of semi-finished and finished products. Manufacturers seeking compliance with RoHS / WEEE directive can quickly and non-destructively screen their products for Hazardous substances and ensure the safety of their products X-Ray. EDX1800B is the most popular model for RoHS and Halogen free testing instrument; it used the USA Spellman HV and High power Copper Tube, equipped with USA famous brand high resolution detector EDX1800B incorporating Skyray's years of RoHS testing and developing. The product is a unique product configurations and fully functional test software, user-friendly interface to meet the needs of the precious metal component testing, user-friendly design, making it easier to complete the testing, can detect a variety of elements, to meet the vast most.
