

# **Jw3208 Optical Power Meter Loss Measurement Without Light Source**

## Overview

---

JW3208 handheld optical power meter is a compact and an easy-to-use testing instrument for optical fiber networks, which can be used for absolute optical power measurements as well as for relative loss measurements in optical fibers. Page 3 1 a Features: User self calibration function Comfortable LCD display and optional backlight LCD display supports night operation Power measurements in dBm or mw and insertion loss in dB Low battery consumption, more than 240 hours continual operation time for three 1. The JW3208 A,JW3208 C Optical Power Meter is a handheld instrument designed for measuring optical power levels in dBm or mW.

## Jw3208 Optical Power Meter Loss Measurement Without Light Source

---

### **Portable JW3208 Optical Power Meter JW3208 JW3208C -50dBm**

JW3208 handheld optical power meter is a compact and an easy-to-use testing instrument for optical fiber networks, which can be used for absolute optical power measurements as well as for relative
