

Ladder-style cable tray effect

Overview

Perforated rungs on a ladder-type tray securely fasten cables using cable ties. A cable ladder, also known as a ladder cable tray, is a support system that consists of two longitudinal side rails connected by individual rungs. These rungs are spaced at regular intervals and provide a structure that resembles a ladder—hence the name. Ladder trays are among the most widely used cable tray systems in industrial and commercial environments, prized for their durability, simplicity, and support capacity.
