

Laos 400G Optical Module SFP

Overview

The 400G QSFP-DD DR4 optical transceiver uses an MPO-12 connector for transmission over SMF (single-mode fiber) and typically supports a reach of up to 500 meters at a central wavelength of 1310nm. Optical modules are optoelectronic devices that perform photoelectric and electro-optic conversions. This product is a 400Gb/s Quad Small Form Factor Pluggable-double density (QSFP-DD) optical module designed for 2km optical communication applications.
