

Length of 12-fiber splitter

Overview

1x2 (50:50) splitter, with 6 inch long output legs and bare fiber terminations. The NVIDIA MFP7E20-Nxxx, is a multimode, 4-channel-to-two 2-channel splitter fiber cable. The Multiple Push On, 12 fiber, Angled Polished Connectors (MPO-12/APC) uses 8 active fibers to transmit light and 4 inactive fibers as strength members. Planar lightwave circuit (PLC) splitter is a type of optical power management device that is fabricated using silica optical waveguide technology to distribute optical signals from Central Office (CO) to multiple premise locations. Standard parts available in this series are FOBS-12P (1x2) and FOBS-22P (2x2) pigtail-style splitters, FOBS-12 (1x2) and FOBS-22 (2x2). One such solution is the MPO-12 Multimode Fiber Splitter Cable, a key component for optimizing bandwidth in data centers, enterprise networks, and telecom systems. Splitters for Specialized Network Links with Various Termination Types and Numbers of Legs.
