

Local Area Network Structured Cabling System

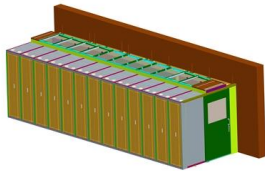

Overview

A structured cabling system is the basis of a computer local area network that allows you to connect computers, phones, peripheral equipment, server power and Wi-Fi access points. In telecommunications, Structured cabling is the design and installation of a complete, standards-compliant telecommunications cabling infrastructure for building, platform, factory or campus cabling infrastructure.

Local Area Network Structured Cabling System

Understanding the Basics of a Structured Cabling System

By investing in a structured cabling system, organizations can future-proof their network infrastructure, ensuring it remains adaptable, efficient, and
