

Main Uses of Optical Cables

Overview

Optical fiber consists of a core and a cladding layer, selected for due to the difference in the refractive index between the two. This coating protects the fiber from damage but does not contribute to its properties.

Main Uses of Optical Cables

10 Uses of Fiber Optic Cables

In this article, we highlight 10 uses of fiber optic cables and the growing demand for these cables. Cables Unlimited can provide assistance.

Fiber-optic cable

Overview Design Performance Cable types Color coding Hybrid cables Innerducts See also

Optical fiber consists of a core and a cladding layer, selected for total internal reflection due to the difference in the refractive index between the two. In practical fibers, the cladding is usually coated with a layer of acrylate polymer or polyimide. This coating protects the fiber from damage but does not contribute to its optical waveguide properties. Individual coated fibers (or fibers formed into ribbons or bundles) then ha
