

Malaysia Fiber Optic Color Mark Amplifier Sensor

Overview

This multi-output color fiber optic amplifier offers enhanced functionality and performance compared to single-output models. It features channel-based color detection, utilizing RGB (red, green, blue) light sources and triple 16-bit computation to achieve precise target. Solidly Stable Presence/Absence Detection at an Amazing Price Smart Fiber Amplifier Units with White LEDs. When installation space is extremely limited or the objects to be detected are tiny, fiber-optic sensors are the ideal solution. Emitter intensity is also stable due to few curvatures and gaps in the beam axis.

Malaysia Fiber Optic Color Mark Amplifier Sensor

Optical Fiber Sensor Factory Color Detection Fiber Optic

Product Description Optical fiber sensor factory color detection fiber optic sensor Fiber Amplifier
Sensor Features: - Dual digital display for timely sensing value

[Contact Us](#)

Fiber Optic Sensors

The BF3 series fiber optic amplifiers come equipped with dual adjusters (COARSE, FINE) for precise sensitivity adjustment. The units feature high-speed response
