High-speed real-time spectrum analyzer WaveSpectra

WaveSpectra WaveSpectra is a tool that performs FFT (Fast Fourier Transform) on a sound signal input from a sound card or Wave file and displays its frequency component (spectrum) in real time. Since it

[Contact Us](#)

Analysis of Mining Samples Using Infrared Spectroscopy and

The FTIR spectrum extends into the mid and thermal infrared range and can therefore respond to the presence of silicates and oxides, in addition to hydrates and carbonates. The key to successful
