

Must wire mesh cable trays be hot-dip galvanized

Overview

While hot-dip galvanized coating protects the material against environmental influences, higher quality and durability are achieved with the pregalvanized process. Thanks to its smooth surface, it is suitable for various coating and welding processes. material : hot-dipped galvanized length:3000mm wire dia: 4mm hole size: 100mm*50mm height: 50mm width: 50MM 100MM 150MM 200MM 250MM 1. Long used in the automotive industry as an anticorrosive protection, the new High Resistance (HR) alloys including Aluminum and Magnesium have. Wire mesh cable tray includes indoor and outdoor use widely used in installation cable in different telecommunication houses, electricity units and engineering project.

Must wire mesh cable trays be hot-dip galvanized

Hot-dip galvanized steel cable trays , Technical guide for demanding

Learn when to choose hot-dip galvanized steel cable trays according to EN ISO 1461: advantages, recommended environments and key design criteria for long-lasting installations.
