

# **New Romanian E2000 Connector**

## Overview

---

The E-2000 is an optical fiber plug connector with push-pull locking mechanism and a self-closing dust protection flap. The E-2000® connector, invented by DIAMOND, delivers unmatched reliability and precision in fiber-optic interconnects - making it the ideal choice for critical transmission points across telecom, industrial, medical, and more applications. Diamond has responded to this challenge and expanded the E-2000™ connector system to address these issues, etc. The thumb-latch and frame are available in eight different configurations (with multiple-service patch facilities). Now more than ever the low optical loss provided by Diamond's Accurate Core Alignment process supports those.

## New Romanian E2000 Connector

---

### E2000 Connectors

E-2000® is an optical fiber plug connector, available for both single mode and multi-mode applications, featuring a spring-loaded shutter and dust-cap. The E-2000 Connector series is a type of fiber optic
