

Niger Aerial Optical Cable

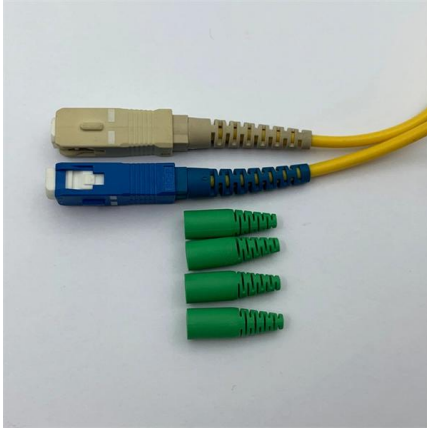

Overview

Niger has taken a major step forward in improving the country's broadband connectivity and regional digital integration by completing provisional acceptance of the fibre-optic sections built under the Trans-Sahara Optical Fibre Backbone Project (TSB) – a project financed by the. Niger has completed a major 640-mile fiber optic cable network, a \$50 million project funded by the African Development Bank, designed to boost broadband access across the country. Running along the country's borders with Algeria, Benin, Burkina Faso, Chad, and Nigeria, the new link aims to. The market remains highly concentrated, with a high Herfindahl-Hirschman Index (HHI). The project promises improved security through better communication and data management, but its impact on tourism remains limited until broader safety and infrastructure.
