

Nokia optical module Gx

Overview

The 1830 GX Series provides industry-leading flexibility in an open compact modular solution, with support for transponder, switchponder and OLS in a single platform. With 300-mm and 600-mm chassis options, it can be optimized for virtually any application, from DCI and metro to long-haul and. DTC is an independent supplier of telecoms equipment and has no affiliation with Nokia Networks DTC is structured to support the. EXA Infrastructure has chosen Nokia's 1830 Global Express (GX) platform and ICE7 1. The upgrade will increase network capacity by up to 15 percent and reduce power and cost per bit by as much as 50 percent.
