

# Om1om2om3om4 fiber optic

## Overview

---

Whether you are a seasoned IT Architect or a curious newcomer to the realm of fiber optics, this article aims to navigate you through OM1 vs OM2 vs OM3 vs OM4 vs OM5 multimode fiber types covering speed, transmission distances, typical applications, a detailed technical comparison. Multimode fiber is a common choice to achieve 10 Gbit/s speed over distances required by LAN enterprise and data center applications. "OM" stands for Optical Multimode, which is a classification system for multimode fiber. 5 microns), MMF is well-suited for short-distance transmission using low-cost LED or VCSEL (Vertical-Cavity Surface-Emitting Laser) light sources.
