

Omrone3nx-fa fiber optic sensor

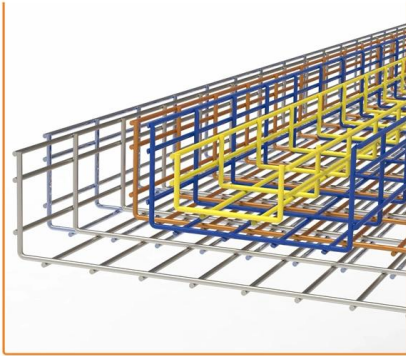

Overview

For full remote control E3NX-FA can be connected to high speed field bus via communication unit E3NW. Please find E3NW order information in "Accessories" and further documentation in "Downloads". The GIGA RAY 2S high-efficiency coupling element achieves a clear signal and wide dynamic range. It is joined by the new "Smart Noise Reduction" light reception algorithm and the high-speed, high-precision "N-Core" IC. Dynamic Power Control (DPC) automatically compensates differences in the incident level caused by dirt or vibration.

Omron E3NX-fa fiber optic sensor

E3NX-FA

Ultra-easy setup with Smart Tuning with a dynamic range expanded 20 times to 40,000:1. Optimum stable detection achieved with light level adjustment even for saturated incident light. White on black
