

# **Optical Fiber Chromatography Identification Table**

## Overview

---

Optical cable sequence chromatogram arrangement Optical fiber chromatogram 1# -12# are generally blue, orange, green, brown, gray, white, red, black, yellow, purple, pink, and light green. At present, the color of the optical fiber and fiber casing within the fiber optic cable is generally identified by full chromatography, and the use of natural color is allowed without affecting the identification. The chromatography of Loose Tube and Fibe Core The chromatographic arrangement of. This Applications Note addresses Corning Optical Communications' identification scheme for optical fiber cables. Munsell color system, L/C/H system, and Delta E system of color identification are described and their equivalence presented. This color code, formerly referred as the "Bellcore"-standard, is the most recognized system worldwide.

## Optical Fiber Chromatography Identification Table

---

### Do You Know The Chromatographic Order Of Fiber Optics?

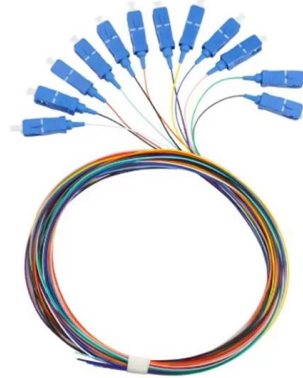

We all know that in the fiber optic cable, more cores are used to distinguish the difference between different cables with color, today we will introduce in detail all the colors in the fiber.
