

Optical Modules for Test and Measurement Equipment

Overview

From optical spectrum analyzers and O/E converters to variable optical attenuators and 4-channel pulse pattern generators, these platform-independent measuring devices combine precision and flexibility. Use this selector tool to quickly identify the best power supply for your aerospace and defense ATE requirements. 3D Interconnect Designer provides a flexible modeling and optimization environment for any advanced interconnect structure, including chiplets, stacked die, packages, and PCBs. Accelerate and improve your design or optimize your production with Luna's suite of component analyzers and testers. Headquartered in Singapore, NEXUSTEST is a global supplier of high-end test equipment for the optical and semiconductor markets.

Optical Modules for Test and Measurement Equipment

Optical Test and Measurement

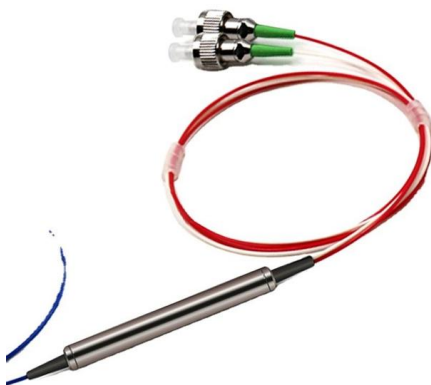

Our product portfolio comprises light sources for various wavelengths, optical power meters for the visible and infrared as well as optical time domain reflectometers (OTDRs) for easy fault detection
