

Pigtail specification fsc102

Overview

Fiber pigtail specification shows fiber type, connector type, polishing type, ferrule material, insertion loss, return loss, tensile strength, operation temperature and other critical parameters. The fiber pigtails are designed to support fusion and mechanical splicing for fiber cabling systems. 1 shows the structure of a typical fiber, which consists of a core, a cladding, and a coating (note that the diagram is not to scale). The coating serves to protect the cladding of glass fibers from particulates that may land on the surface of the fiber, causing it to become brittle.

Pigtail specification fsc102

Opti-Core Fiber Optic Patch Cords and Pigtails

fusion splice field termination applications. Both fiber optic patch cords and pigtails are available in OM1, OM3, OM4, OM4+, OM5 and OS2 fiber types to meet the demands of Gigabit Ethernet, 10.
