

# PoE power supply PoE switch

## Overview

---

Standards-based Power over Ethernet is implemented following the specifications in IEEE 802.

## PoE power supply PoE switch

---

### TL-SF1008P

What This Product Does TL-SF1008P is an 8 10/100Mbps ports unmanaged switch that requires no configuration and provides 4 PoE (Power over Ethernet) ports. It can automatically detect and supply

**Power over Ethernet**

OverviewStandard implementationTechniquesStandards developmentUsesTerminologyPower management features and integrationNon-standard implementations

Standards-based Power over Ethernet is implemented following the specifications in IEEE 802.3af-2003 (which was later incorporated as Clause 33 into IEEE 802.3-2005) or the 2009 update, IEEE 802.3at. The standards require

Category 5 cable or better for high power levels but allow using Category 3 cable if less power is required. In multi-pair cases, PoE supplies power as a common-mode signal over two or more of the differential pairs
