

Pre-power-on inspection of the distribution box

Overview

To ensure that the electrical testing & pre-commissioning of the control, distribution, and miscellaneous panel are carried out in a manner that is risk-free, productive, and in accordance with good working practice, as required by the project work specifications. This procedure is intended to provide general application guidance and establish. Prior to on-site pre-commissioning, there are some key off-site activities to take place to ensure that our electrical pre-commissioning goes smoothly. Presumably, the extensive and thorough individual testing of the equipment has finished before the system's commissioning started.
